1 Introduction

Topics covered in this chapter:

1.1 Search facilities and conventions	page 4
1.2 Liability	page 4
1.3 Support	page 5
1.4 Trademarks	page 5

1.1 Search facilities and conventions

Find information quickly

This manual offers the following search facilities:

- ⇔ In the footnote at the bottom of the page, you may check which chapter and which section you are actually reading.
- ⇔ A glossary at the end of the manual contains explanations on the technical terms used in this manual.
- ⇔ An index at the end of the manual allows precise search for the information contained in this manual.

Conventions

This manual uses different font styles and symbols to highlight important paragraphs and to ease its use.

Font	Use
bold	Buttons, icons, names of entry fields, and elements of the software's user interface. Also used for highlighting warnings and notices.
<i>bold italic</i>	Registered names and trademarks.
SMALL CAPITALS	Window and dialogue box titles.
<u><i>underlined italic</i></u>	The name of the user mode which is concerned by the current section. You need not read sections that don't concern the user mode you are currently working with.
Symbol	Use
	Indicates hints and notes that may ease the use of the XNAV3550 .
	Indicates additional information.
	Warns against dangers that might cause damage to objects and persons.

1.2 Liability

Limitation of liability

The software and the manual are subject to change without notice. Dual may not be liable for the correctness of the information contained in this manual nor for damages resulting from the use of this manual.

To improve the quality of our products and our services, we appreciate all suggestions for improvement and all error notices.

1.3 Support

Customer Care

Email Support:

cs@dualav.com

Telephone Support:

1.4 Trademarks

Registered trademarks

All brands and trademarks mentioned in this document are possibly registered by third party and subject to the current legislation and to the rights of their respective owners without reservation. All mentioned names of products, societies, or brands may be registered trademarks of their respective owners. Every right that is not explicitly accorded is reserved.

The absence of an explicit labeling of registered trademarks does not allow the conclusion that this brand was not subject to the rights of third party.

⇔ Outlook, Windows and ActiveSync are registered trademarks of the Microsoft Corporation.

2 Before you begin

Topics covered in this chapter:

2.1	The basic principle of navigation	page 7
2.2	Important safety information	page 8
	Safety information on the GPS receiver	
	Safety information on the installation in the vehicle	

2.1 The basic principle of navigation

XNAV3550

The time of complicated and frustrating inquiries on the right way in folded maps is over. From now on **XNAV3550**, your navigation system, will guide you, based on satellite information, quickly and safely to your destination.

GPS based navigation

The **G**lobal **P**ositioning **S**ystem (GPS) network was originally been developed in the 70s, as a weapon guidance system for the American armed forces.

GPS is based on 24 satellites, which are in orbit round the earth and which are permanently emitting signals. The GPS receiver receives those signals and calculates, based on the runtime of the signals, his distance from the respective satellites. This information serves for calculation your current geographic position.

The signals of at least three satellites are needed to determine the longitude and the latitude. With the signals of at least four satellites the elevation may be calculated, too. The determination has an accuracy of about 9 feet.

Navigation with GPS

The delivered maps contain the geographic coordinates of the points of interest, streets and cities they represent. Thus the navigation system can calculate a route from a given start point to a given destination point.

In case your navigation system receives the signals of at least three satellites it may determine your current position and represents it on the map. This position may then serve as start point for navigation purposes.

As the determination and representation of your position is carried out once a second, you may watch your movements on the map.

2.2 Important safety information

Note

In your own interest, read the following notices and safety information carefully before starting up your navigation system.

2.2.1 Safety information on navigation

Use of **XNAV3550** is executed at your own risk.

Caution: To protect yourself and others from accidents please do not operate the navigation system while driving!

Caution: You must not look at the display except when it is absolutely safe to do so!

Caution: The road layout and the traffic signs are absolutely prior to the instructions of the navigation system.

Caution: You must not follow the instructions of **XNAV3550** except when the circumstances and the road traffic regulations allow doing so. **XNAV3550** will guide you to your destination even when you have left your planned itinerary.

Note: We recommend effecting route planning before beginning the journey. If you are on the road and you want to establish a new itinerary, please drive to the next parking site!

Note: If you have not understood the instructions or if you are not sure about what to do next you may quickly refer to the map or arrow view of your navigation system.

2.2.2 Safety information on the GPS receiver

Caution: As it is not waterproof, do not expose your GPS receiver to water!

Caution: Do not install the cable next to security relevant equipment and supply lines.

Caution: Please check the security relevant equipment when you have installed the navigation system.

Caution: The GPS receiver should be disconnected from the power supply while your car is parking. As it spends energy permanently, you might risk discharging the car battery.

Caution: The installation of the GPS receiver must not interfere with the sure operation of your car.

Note: Do not varnish the GPS receiver. Doing so might impede the reception of GPS signals.

Note: Do not use any harsh solvents for cleaning the GPS receiver. A damp cloth is sufficient! You might damage the case of the GPS receiver.

Note: Do not unplug by pulling the cable. This might damage the cable!

Note: Do not fold the cable. Check that the cable may not be damaged by any sharp object.

2.2.3 Safety information on the installation in the vehicle

Caution: Do not fix the holder within the deployment zone of airbags.

Caution: When you install the holder, please check that it may not constitute any safety risk, even in case of an accident.

3 Operating the navigation software

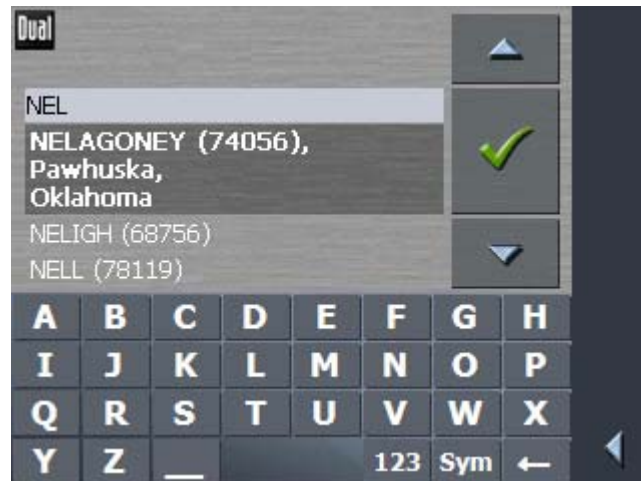

Topics covered in this chapter:

3.1	Software keyboard	page 11
3.2	Command buttons	page 12
	Command buttons with caption	
3.3	Lists	page 14

3.1 Software keyboard

Survey

A software keyboard appears at the bottom of the screen when text entries are necessary.

You may carry out all entries with your finger on the character keyboard. But you may enter capital letters only.

You need not enter small letters or special characters when entering a destination's city or street name. **XNAV3550** replaces these characters automatically. When you are looking for, e.g., a French city called "Héroinès", simply type "HEROINES".

*Entering a space,
deleting a
character...*

Tap the  icon to enter a space character.

Tap the  icon to delete the character at the left of the cursor.

*Switching between
character and
number entry...*

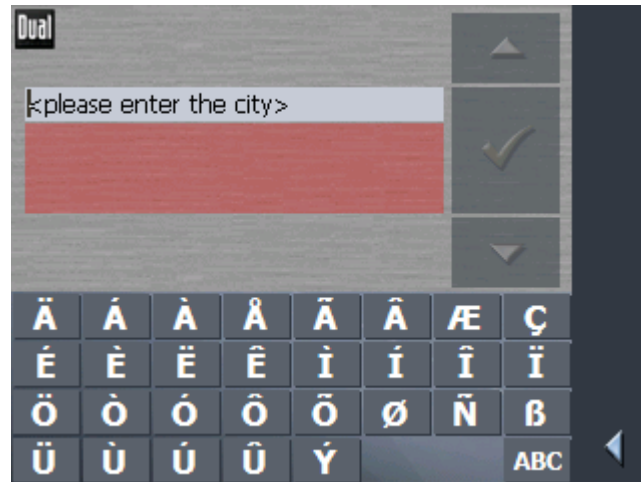

Tap the  icon to enter numbers, e.g. for a ZIP code.

Tap the  icon to return to the character entry mode.

Special characters

Tap the **Sym** icon to enter a special character.

The special characters keyboard appears.

As soon as you have entered a special character the letter keyboard reappears.

You need not enter special characters when entering a destination's city or street name but they may be helpful for entering names for saved destinations and itineraries.

Moving the cursor

If you want to delete another character than the one to the left of the cursor position, or if you want to insert a character at another place than at the end of the text, you have to move the cursor to the respective place.

Just tap the place where you want to have the cursor.

3.2 Command buttons

Icons

The following buttons appear at the bottom of every **XNAV3550** screen:

**Return**

Tap this icon to return to the previous screen. This icon is not available on the **MAIN SCREEN**.

**Main screen**

Tap this icon to open the main screen. This icon is not available on the **MAIN SCREEN**.

GPS

The **GPS** symbol is placed at the bottom of the screen. The different GPS icons have the following significance:

Symbol	Significance
 No GPS	A GPS receiver is not connected or the power supply is interrupted.
 No signal	A GPS receiver is connected, but the received signals are not convenient for navigation purposes (e.g. because you are in a closed building).
 GPS ready	The signals are convenient. Navigation may begin.

Tap the **GPS** icon to display the current GPS status:

Entry	Significance
GMT	Greenwich Mean Time Time of London ignoring daylight saving time.
Longitude / Latitude	Current position: Indication of east longitude and north latitude.
Satellites	Number of received satellites. At least three satellites must be received for navigation purposes.
HDOP	Horizontal Dilution of Precision: Indicates the quality of position determination. Theoretically any value from 0 to 50 may occur. The smaller the value, the more accurate is the position determination (value 0 = no deviation from the real position). Values up to 8 are convenient for navigation purposes.

Entry	Significance
Speed	Indicates your current speed.
Position	Indicates the address of your current position.
Save	Tap this button to add the current address to the FAVORITES .
Quit	Tap this button to quit the GPS screen.

3.2.1 Command buttons with caption

Command buttons

You will find command buttons with captions on almost every screen of **XNAV3550**. There are three groups of command buttons:

1. Command buttons with a defined functionality.

These buttons are designed to execute a functionality, which is indicated by their caption. They are normally buttons like **Save**, **OK**, **Cancel**, **Select map**, **Navigation** etc.

2. Buttons to select one of two possibilities.

These buttons are designed to select one of two possibilities. Normally, the current state is indicated by the caption of the button. They are normally buttons like **User mode**, **Yes-No**, **On-Off**.

When you tap one of these buttons, the caption switches to the other possibility. This change must be confirmed by clicking another button (normally **OK** or **Save**) before the current screen closes.

3. Buttons to enter data.

Subsequently, these buttons will be referred to as entry fields. The caption either your last entry or **<please select>**. They are buttons like **City or ZIP**, **Street**, **Category** (of a POI) etc.

When you tap an entry field, another screen with a software keyboard, a list, or with both of them opens where you can make your entries. This entry must be confirmed by clicking another button (normally **OK** or **Save**) before the entry screen closes. Your entry becomes then the caption of the entry field.

For information on the use of the keyboard, please refer to „Software keyboard“.

For information on working with lists, please refer to "Lists".

3.3 Lists

Survey

There are many cases where you have to select an entry from a list.

If, for example, you have not completely entered the name of a city before tapping **OK**, a list appears which contains all cities

beginning with your entry or having it into their names. The ZIP code of the cities also indicated in order to allow you to choose the correct one if there is more than one city with the same name.

Entry with focus

One of the entries has the focus. This entry is written in bold. Moreover, there is often some additional information on that entry in a 2nd or 3rd line. In a list of cities, there is indicated the country (or state or province) the respective city belongs to.

Icons

Example

At the right hand side of lists, there are three icons:

OK: Tap this icon to confirm the selection of the entry with the focus (which is placed directly at the left of the OK icon).

Up: Tap this icon to scroll the list one item up.

Down: Tap this icon to scroll the list one item down.

Search for ABERNATHY.

1. In the **MAIN SCREEN** tap **Navigation**.

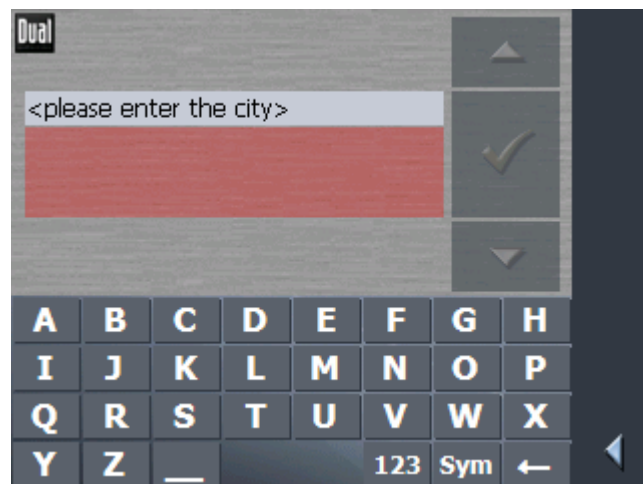

The **DESTINATION** screen opens.

2. Tap **Address**.

The **ADDRESS** screen opens.

3. Tap the **City** entry field.

The software keyboard appears.

4. Enter the letters ABER.

All cities beginning with ABER or having ABER in their names are listed.

When the list is very long, you may enter one more letter in order to shorten the list.

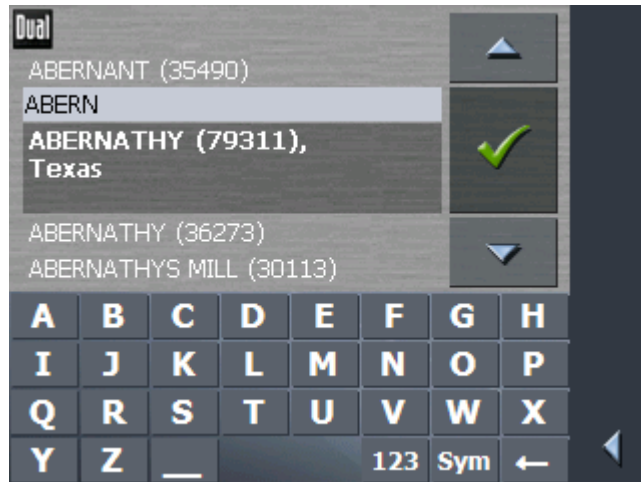

Enter N.

All cities beginning with ABERN or having ABERN in their names are listed.

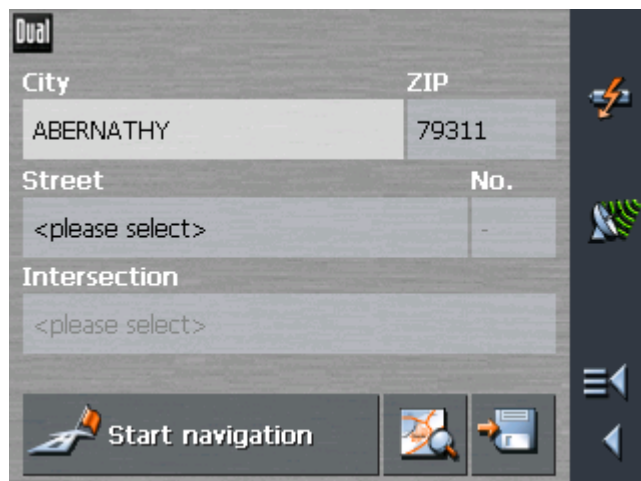

5. Tap the **Down** icon repeatedly until ABERNATHY appears directly under the white entry field.

The entry ABERNATHY has the focus.

6. Tap .

The **ADDRESS** screen reappears. ABERNATHY is entered into the **City** field.

4 User modes

Topics covered in this chapter:

4.1	Two different user modes	page 19
4.2	Changing the user mode	page 19
4.3	Standard mode	page 21
4.4	Extended mode	page 21

4.1 Two different user modes

Survey

XNAV3550 can be operated in two different user modes: Standard and Extended. This grants an optimum of usability for each user: Less experienced users and users who do not need using the complete functionality of the software work in standard mode. Experienced users who are ready to spend some time in getting used to operate the complete functionality work in extended mode.

Some configuration settings have an effect on the work in standard mode but can only be changed in extended mode. For further information, please refer to "Configuring XNAV3550".

4.2 Changing the user mode

You may at any time switch to the other user mode.

1. In the **MAIN SCREEN**, tap **Settings**.

The **SETTINGS** screen appears:

The **User mode** entry is at the top of the list. If it is not selected, tap the **Up** icon repeatedly until **User mode** is selected.

2. Tap .

The **USER MODE** screen appears:

Your current user mode is indicated on the **Current user mode** field.

3. Tap **Current user mode** to switch to the other user mode.

The name of the user mode you want to switch to becomes the caption of the entry field.

4. Tap **Save** to save the changes.

Note: When you switch to standard mode, a dialog window asks you whether you want to keep the configuration changes you have made in extended mode. This dialog window appears even when you have not made any configuration changes. Tap **Yes** if you want to keep these changes.

The **USER MODE** screen closes and you are in the Main screen of the user mode you have just switched to.

4.3 Standard mode

Survey In standard mode, the software is easier to operate. As it offers reduced functionality, functions may be accessed quicker. So, if you do not need functions like Route planning or indicating a destination on the map, we recommend working in standard mode.

Functionality In standard mode, you can:

- ⇔ Select another map
- ⇔ Indicate a direction directly on the map
- ⇔ Enter a destination to navigate to (Address, POI)
- ⇔ Navigate home
- ⇔ Select a saved destination
- ⇔ Save destinations
- ⇔ Select a destination from the recent destinations list
- ⇔ Change some configuration settings

4.4 Extended mode

Survey In extended mode, you dispose of the complete functionality of **XNAV3550**. You may for example indicate and navigate to more than one destination (route planning with stopovers). You may change all configuration settings. If you want to use the complete functionality, work in extended mode.

Functionality In addition to the functions of the standard mode, the extended mode enables you to:

- ⇔ Select another map
- ⇔ Plan and save routes with several stopovers
- ⇔ Adjust the route options before each navigation
- ⇔ Change all configuration settings

5 Navigation

Topics covered in this chapter:

5.1	General information on navigation	page 23
5.2	Starting XNAV3550	page 24
	Extended mode	
	Standard mode	
5.3	Indicating a destination	page 27
	Entering an address	
	Selecting a point of interest	
	Indicating destinations on the map	
	Favorites	
	Recent destinations	
	Using your home address	
5.4	Destination management	page 42
	Saving a destination	
	Renaming a destination	
	Deleting a destination	
5.5	Route planning (Itineraries with stopovers)	page 45
	Indicating route points	
	Editing, saving and managing itineraries	
	Calculating the route	
	Displaying the route on the map	
	Simulating the route	
5.6	Starting navigation	page 56

5.1 General information on navigation

Use of **XNAV3550** is executed at your our risk.

Caution: To protect yourself and others from accidents, do not program the navigation system while driving. Enter or select your destination and activate the navigation system before you begin to drive!

Caution: Do not look at the display unless it is absolutely safe to do so! Safe driving is the first priority!

Caution: The rules of the road and traffic signs must be obeyed prior to following instructions from the navigation system.

Caution: Do not follow the instructions of **XNAV3550** unless circumstances and the road traffic regulations allow doing so. **XNAV3550** will guide you to your destination even when you have gone off course from your route.

Obstructed GPS reception

When you turn off the GPS receiver or when the reception of GPS signals is obstructed **XNAV3550** does not close but navigation is interrupted.

As soon as the GPS receiver works again the navigation system notices a possible change of your current position and recalculates the route. You may simply continue navigation.

Quitting navigation mode

When you quit navigation mode by command the **MAIN SCREEN** appears. You may then indicate another destination or reassume the by selecting the former destination from the **Recent destinations** list.

Arriving at your destination

When you have reached your destination the system pronounces the message "You have reached your destination!"

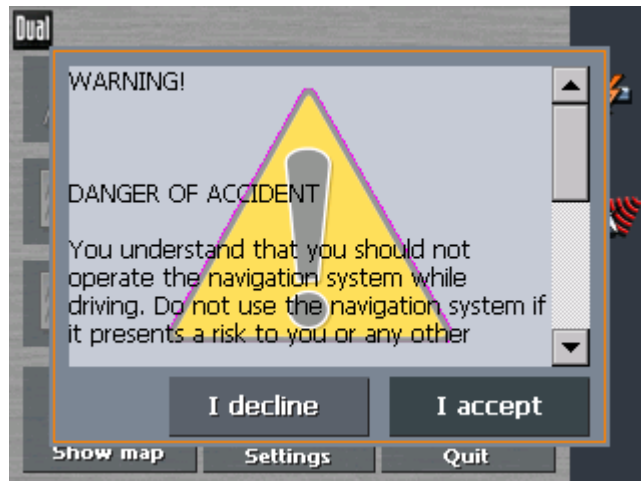

The map is no more presented in navigation mode. A small green arrow indicates your current position.

5.2 Starting XNAV3550

Starting the navigation software...

1. Turn your device on.

At the first start (and each time you had terminated **XNAV3550** via the **Quit** icon), the following message appears:

2. Tap the **I accept** button. If you do not accept and if you tap the **I decline** button, the software terminates.

5.2.1 Extended mode

The **MAIN SCREEN** appears:

Main screen

All functions of the program are accessible via the **MAIN SCREEN**.

Note: When you turn your device on it shows the screen which was displayed when it was turned off. Nevertheless, you may access the **MAIN SCREEN** from all other screens by tapping

One destination

Tap the **Navigation** button to indicate a destination for navigation (no stopover).

For details, please refer to "Indicating a destination".

Navigation homewards

Tap the **Home** icon to navigate to your home address.

For details, please refer to "Using your home address".

Route planning

Tap the **Route planning** button for route planning purposes.

For details, please refer to "Route planning (Itineraries with stopovers)".

Show map

Tap the **Show map** button to display the map which is currently in use..

*Select map*

Tap the **Map** button to select another map from the storage card which is currently inserted.

For details, please refer to "Working with the map".

Settings

Tap the **Settings** button to modify the settings of **XNAV3550**.

For details, please refer to "Settings".

Quit

Tap the **Quit** button to quit **XNAV3550**.

5.2.2 Standard mode

The **MAIN SCREEN** appears:

Main screen

Note: When you turn your device on it shows the screen which was displayed when it was turned off. Nevertheless, you may access the **MAIN SCREEN** from all other screens by tapping

One destination

Tap the **Navigation** button to indicate a destination for navigation (no stopover).

For details, please refer to "Indicating a destination".

Navigation homewards

Tap the **Home** icon to navigate to your home address.

For details, please refer to "Using your home address".

Favorites

Tap the **Favorites** button to navigate to a favorite.

For details, please refer to "Favorites".

Recent destinations

Tap the **Recent destinations** button to select a destination entered previously.

For details, please refer to "Recent destinations".

Show map

Tap the **Show map** button to display the map which is currently in use.

*Settings*

Tap the **Settings** button to modify the settings of **XNAV3550**.

For details, please refer to "Settings".

Quit

Tap the **Quit** button to quit **XNAV3550**.

5.3 Indicating a destination

Basic principle of navigation

In this chapter you will learn about the possibilities for indicating and managing destinations in **XNAV3550**.

For details on how to start navigation to a destination, please refer to "Starting navigation".

Indicating a destination

In **XNAV3550** there are several possibilities to enter or to select destinations:

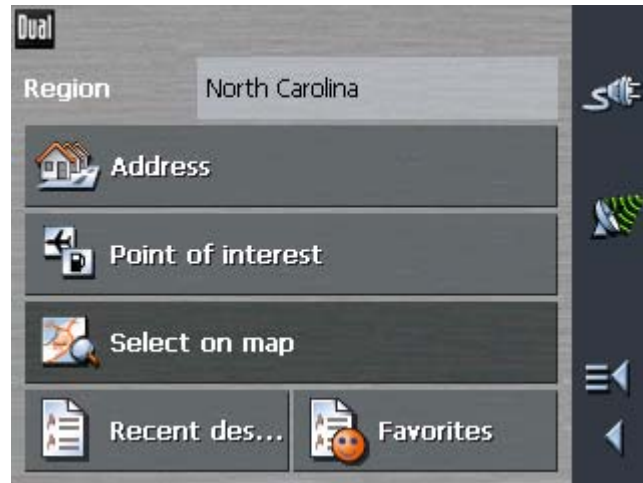

- ⇔ Entering an address
- ⇔ Selecting a point of interest
- ⇔ Indicating destinations on the map
- ⇔ Favorites
- ⇔ Recent destinations
- ⇔ Using your home address

5.3.1 Entering an address

Extended mode

1. In the **MAIN SCREEN**, tap **Navigation**.

The **DESTINATION** screen opens.

- 1a Tap the **Region** entry field and select the country (or state, or province) of your destination if it is not yet indicated.

Note: Only countries (or states or provinces) of which at least a part is represented on the currently loaded map may be selected.

- 1b On the **DESTINATION** screen, tap **Address**.

Standard mode

1. In the **MAIN SCREEN**, tap **Navigation**.

The **DESTINATION** screen opens.

- 1a Tap the **Region** entry field and select the country (or state, or province) of your destination if it is not yet indicated.

Note: Only countries (or states or provinces) of which at least a part is represented on the currently loaded map may be selected.

- 1b On the **DESTINATION** screen, tap **Address**.

Indicating an address...

The **ADDRESS** screen opens. Enter either the name or the ZIP code of your destination.

- 2 Tap the **City** entry field if you want to enter the destination city's name.

For information on working with lists, please refer to "Lists".

- ODER -

- 2a Tap the **ZIP** entry field if you want to enter the destination city's ZIP code:-

Note: ZIP codes must entered completely!

The search for cities with this ZIP code starts immediately.

In case the current map does not contain a city with the ZIP code you have entered you are prompted to verify your entry.

3. Enter the destination street into the **Street** entry field.
4. Enter then the house number of your destination into the **Nr.** field, if you know it.

Note: If the house numbers of the respective street are stored in the database of places, you may tap the field besides the **Street** field.

If no house numbers are stored, the respective field is deactivated. The software navigates to the respective street

5. Or enter the name of an intersection into the **Intersection** entry field if you want to define an intersection as destination point (e.g. because the house number is not available).

For information on saving destinations, please refer to "Saving a destination".

5.3.2 Selecting a point of interest

Points of interest

Points of Interest, also referred to as POIs, are stored in the database of places and may be displayed on the map. Ports, airports, restaurants, hotels, gas stations, public buildings, and others belong to the special destinations.

Indicate a point of interest by selecting one

Point of interest nearby

Note: You may only select Points of interest nearby when the GPS receiver is turned on and when the GPS signal strength is sufficient.

Extended mode

1. In the **MAIN SCREEN**, tap **Navigation**.

The **DESTINATION** screen opens.

Tap the **Region** entry field and select the country (or state, or province) of your destination if it is not yet indicated.

Note: Only countries (or states or provinces) of which at least a part is represented on the currently loaded map may be selected.

- 1a On the **DESTINATION** screen, tap **Point of interest**.

The **POINT OF INTEREST** screen opens:

- 1b On the **POINT OF INTEREST** screen, tap **...nearby GPS position**.

Standard mode

1. In the **MAIN SCREEN**, tap **Navigation**.

The **DESTINATION** screen opens.

Tap the **Region** entry field and select the country (or state, or province) of your destination if it is not yet indicated.

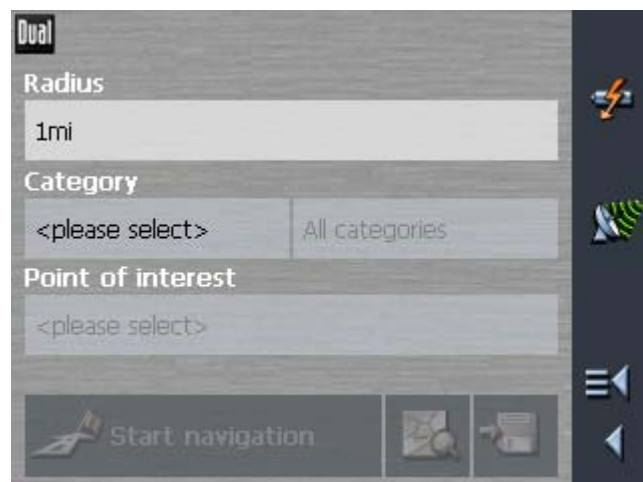

Note: Only countries (or states or provinces) of which at least a part is represented on the currently loaded map may be selected.

- 1a On the **DESTINATION** screen, tap **...nearby GPS position**.

Selecting a Point of interest nearby...

The **POI NEARBY** screen opens:

2. Enter the radius around your current position within which you want to search for points of interest into the **Radius** entry field.
3. Select the main category of points of interest to search for from the left one of the two **Category** list fields, e.g. "Garage". Only points of interest situated within the indicated radius will be displayed.
4. Select the **Subcategory** of points of interest to search for from the right one of the two **Category** list fields, e.g. "Audi VW Seat Skoda".

For information on working with lists, please refer to "Lists".

Note: If you leave the **Subcategory** field empty, all points of interest matching with the selected main category will be listed in the **Point of interest** list field.

5. Select the correct destination from the **Point of interest** list field.

Note: You need not make entries into the **Category** and **Subcategory** fields. Their purpose is only to shorten the **Point of interest** list. This list may become very extensive, especially in big cities.

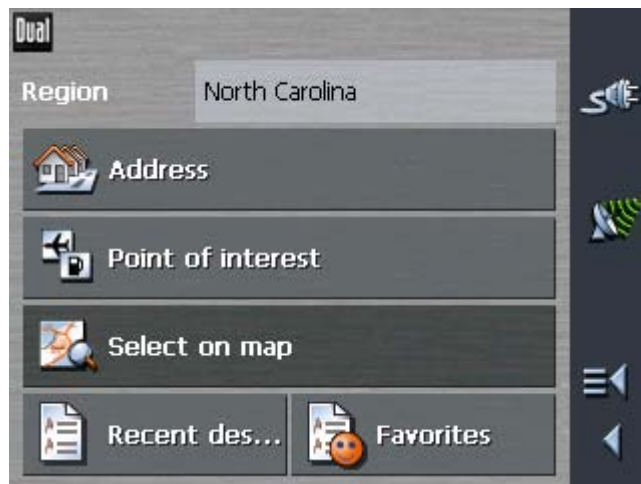

For information on saving destinations, please refer to "Saving a destination".

Point of interest in a certain city

Extended mode

1. In the **MAIN SCREEN**, tap **Navigation**.

The **DESTINATION** screen opens.

Tap the **Region** entry field and select the country (or state, or province) of your destination if it is not yet indicated.

Note: Only countries (or states or provinces) of which at least a part is represented on the currently loaded map may be selected.

- 1a On the **DESTINATION** screen, tap **Point of interest**.

The **POINT OF INTEREST** screen opens:

1b On the **POINT OF INTEREST** screen, tap **...in a browsed city**.

Standard mode

1. In the **MAIN SCREEN**, tap **Navigation**.

The **DESTINATION** screen opens.

Tap the **Region** entry field and select the country (or state, or province) of your destination if it is not yet indicated.

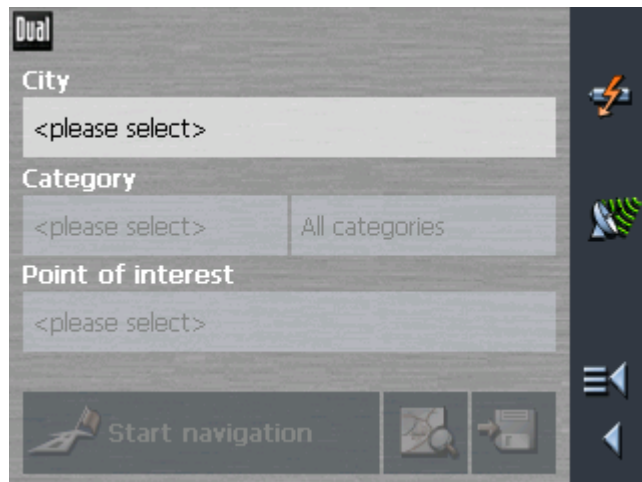

Note: Only countries (or states or provinces) of which at least a part is represented on the currently loaded map may be selected.

1a On the **DESTINATION** screen, tap **...in a browsed city**.

Selecting a Point of interest in a certain city...

The **POI in a city** screen opens:

2. Enter the name of the city in which you want to search for points of interest into the **City** field.
3. Select the main category of points of interest to search for from the **Category** list field (e.g. Nightlife). Only categories matching your City or ZIP entry are listed.
4. Select the **Subcategory** of points of interest to search for from the right one of the two **Category** list fields (e.g. Cinema).
5. Select the correct destination from the **Point of interest** list field.

For information on working with lists, please refer to "Lists".

Note: You need not make entries into the **Category** and **Subcategory** fields. Their purpose is only to shorten the **Point of interest** list. This list may become very extensive, especially in big cities.

For information on saving destinations, please refer to "Saving a destination".

Point of interest of nationwide significance

This function is only available in "Extended mode".

For information on how to change the user mode, please refer to "Changing the user mode".

1. In the **MAIN SCREEN**, tap **Navigation**.

The **DESTINATION** screen opens.

Tap the **Region** entry field and select the country (or state, or province) of your destination if it is not yet indicated.

Note: Only countries (or states or provinces) of which at least a part is represented on the currently loaded map may be selected.

2. On the **DESTINATION** screen, tap **Point of interest**.

The **POINT OF INTEREST** screen opens:

3. On the **POINT OF INTEREST** screen, tap **...nationwide**.

Selecting a Point of interest of nationwide significance...

The **POI NATIONWIDE** screen opens:

4. Select the main category of points of interest to search for from the **Category** list field (e.g. Airports).
5. Select the correct destination from the **Point of interest** list field.

For information on working with lists, please refer to "Lists".

Note: You need not make entries into the **Category** field. Their purpose is only to shorten the **Point of interest** list. This list may become very extensive, especially in big cities.

5.3.3 Indicating destinations on the map

You may indicate a destination directly on the map. In addition to cities and streets, you may also select points of interest quickly.

This function is only available in "Extended mode".

For information on how to change the user mode, please refer to "Changing the user mode".

Extended mode

1. In the **MAIN SCREEN**, tap **Navigation**.

The **DESTINATION** screen opens.

Tap the **Region** entry field and select the country (or state, or province) of your destination if it is not yet indicated.

Note: Only countries of which at least a part is represented on the currently loaded map may be selected.

Indicating a destination on the map...

1. On the **DESTINATION** screen, tap **Select on map**.

The **MAP** screen opens:

2. Tap on the place you want to determine as destination and hold.

A circle of orange points appears round the selected place:

Database information on the respective place will be loaded and displayed. Below the information, there are command buttons for several functions which are available for the selected place.

You have the following options:

This function is only available when GPS reception is possible (The GPS symbol must be **GPS ready**).

Tap the **Start navigation** button to start navigation to the selected place.

Caution: Using this function while you are already navigating deletes all current destinations (stopovers and destination point).

Tap the **Save** button to save the selected place. You may then at any time select this place from the **FAVORITES**.

Tap the **Search nearby** button to search for a point of interest near the selected place.

This function is only available in "Extended mode".

Tap the **Add to route** button to add the selected place to your itinerary. The selected point will be marked by a little flag. It will also be added to the list of route points of the **ROUTE PLANNING** screen where it figures as destination point.

Using this function while you are already navigating causes an immediate recalculation of your route.

This function is only available in "Extended mode".

Tap the **Interim destination** button to make the selected point the next stopover of your itinerary. Your route will be recalculated immediately.

5.3.4 Favorites

Survey

All destinations you have saved by tapping the **Save** button are listed on the **FAVORITES** screen. On this screen you may:

- ⇔ select destinations for navigation purposes,
- ⇔ rename destinations, and
- ⇔ delete destinations from the list.

Extended mode

1. In the **MAIN SCREEN**, tap **Navigation**.

The **DESTINATION** screen opens.

Tap the **Region** entry field and select the country (or state, or province) of your destination if it is not yet indicated.

Note: Only countries (or states or provinces) of which at least a part is represented on the currently loaded map may be selected.

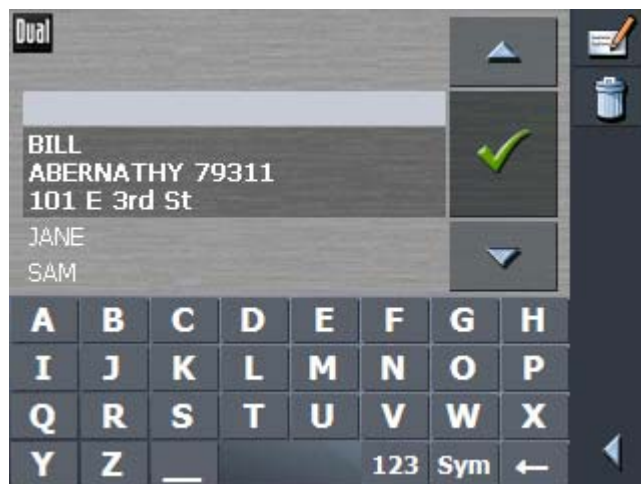

- 1a On the **DESTINATION** screen, tap **Favorites**.

Standard mode

1. In the **MAIN SCREEN**, tap **Favorites**.

Saved destinations

The **FAVORITES** screen opens.

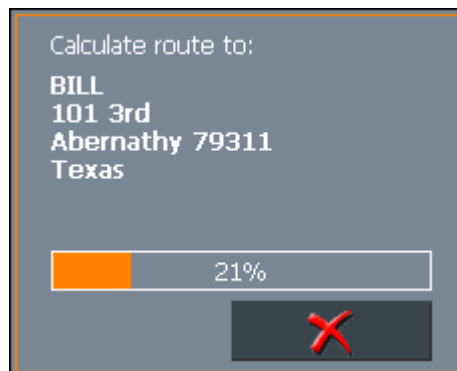

2. Tap the entry of the respective destination.

For information on working with lists, please refer to "Lists".

3. Tap .

The route to the selected destination will be calculated. A message window will inform you on the progress of the calculation.

You may begin navigation to the selected destination once route calculation is complete.

For information on deleting or renaming saved destinations, please refer to "Destination management".

5.3.5 Recent destinations

Survey

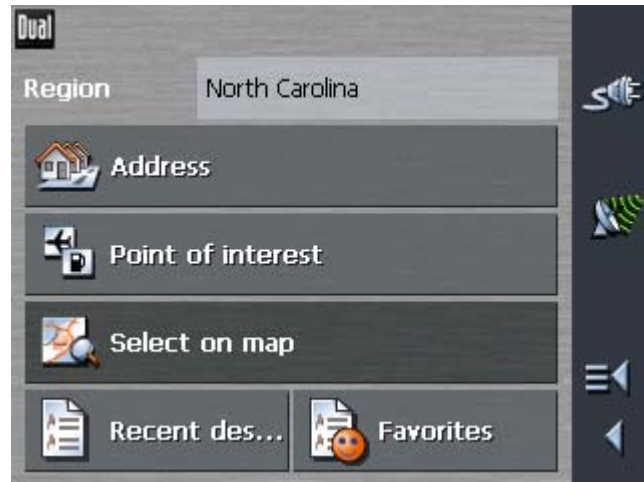

All destinations you have navigated to recently are listed on the **RECENT DESTINATIONS** screen. On this screen you may:

- ⇔ select destinations for navigation purposes,
- ⇔ Add destinations to the **FAVORITES** list, and
- ⇔ delete destinations from the **RECENT DESTINATIONS** list.

Extended mode

1. In the **MAIN SCREEN**, tap **Navigation**.

The **DESTINATION** screen opens.

Tap the **Region** entry field and select the country (or state, or province) of your destination if it is not yet indicated.

Note: Only countries of which at least a part is represented on the currently loaded map may be selected.

- 1b On the **DESTINATION** screen, tap **Recent destinations**.

Standard mode

1. In the **MAIN SCREEN**, tap **Recent destinations**.

Recent destinations

The **RECENT DESTINATIONS** screen opens.

2. Tap the entry of the desired destination.

For information on working with lists, please refer to "Lists".

3. Tap .

The route to the selected destination will be calculated. A message window will inform you on the progress of the calculation. You may begin navigation to the selected destination once route calculation is complete.

5.3.6 Using your home address

Survey

If you have stored your home address you may quickly start navigation home at any place.

For information on saving your home address, please refer to "Home address".

Navigating homewards...

1. On the **MAIN SCREEN** tap the **Home** icon.

The route is now being calculated and navigation starts.

The calculation is based on the settings you have configured in **SETTINGS – ROUTING OPTIONS**.

For details, please refer to "Settings".

5.4 Destination management

Survey

Destinations may be stored in two lists:

- ⇔ the **FAVORITES**
- ⇔ the **RECENT DESTINATIONS** list

Every destination you are indicating and the destinations from the **RECENT DESTINATIONS** list may be added to the **FAVORITES**. This makes sense if you want to navigate more often to the respective destination.

Destinations from the **FAVORITES** may be renamed.

Items from both lists may be deleted.

5.4.1 Saving a destination

Precondition

You have entered a destination as described in "Indicating a destination"

- OR -

You have opened the **RECENT DESTINATIONS** list as described in "Recent destinations".

1. Tap the **Save** icon.

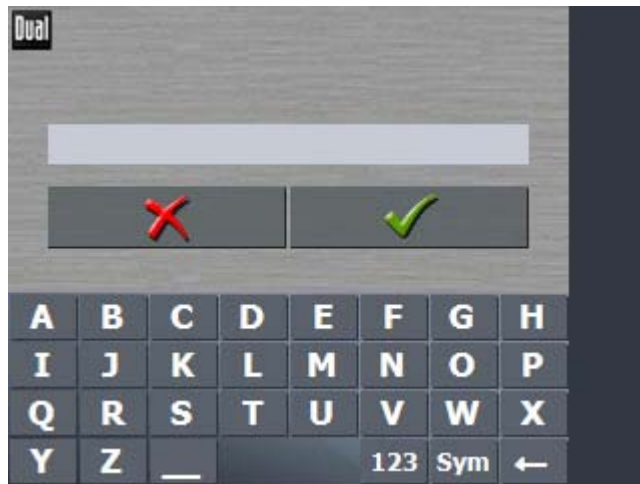

If you have opened the **RECENT DESTINATIONS** list, tap the

Edit icon.

The **NAME OF DESTINATION** screen opens.

2. Enter a name for the destination.

For information on the use of the keyboard, please refer to "Software keyboard".

3. Tap

The destination has now been added to the **FAVORITES**.

5.4.2 Renaming a destination

1. On the **DESTINATION** screen, tap **Favorites**.

The **FAVORITES** screen opens.

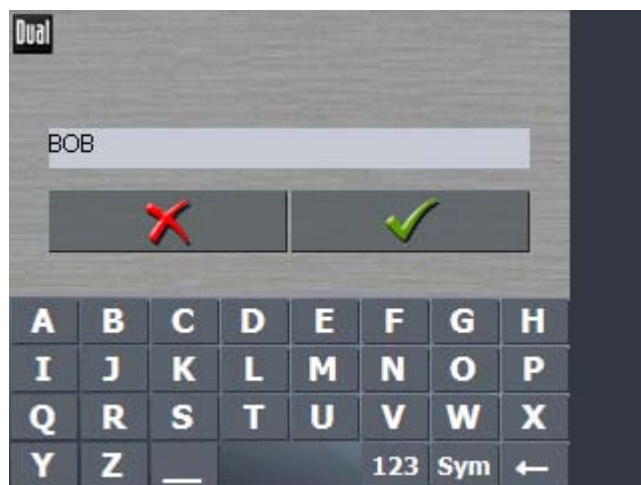

2. Select the destination you want to rename.

For information on working with lists, please refer to "Lists".

3. Tap the **Edit** icon.

The **NAME OF DESTINATION** screen opens.

4. Enter the new name of the destination.

For information on the use of the keyboard, please refer to "Software keyboard".

5. Tap .

The destination is now renamed.

5.4.3 Deleting a destination

Precondition

You have opened the **FAVORITES** as described in "Favorites"
 - OR -
 You have opened the **RECENT DESTINATIONS** list as described in
 "Recent destinations".

1. Tap the entry of the destination to be deleted.
 For information on working with lists, please refer to "Lists".
2. Tap the **Delete** icon.
 The **CONFIRM** screen opens.

3. Tap  to delete the destination from the list.
 The destination is now deleted from the list.

5.5 Route planning (Itineraries with stopovers)

This function is only available in "Extended mode".
 For information on how to change the user mode, please refer to
 "Changing the user mode".

Route planning

You may plan itineraries without receiving GPS signals, e.g. comfortably at home. Planned itineraries may be stored. Thus you may plan as many itineraries as you want, e.g. for holidays.

5.5.1 Indicating route points

Planning itineraries...

1. On the **MAIN SCREEN**, tap **Route planning**.

The **ROUTE PLANNING** screen opens:

2. Tap the **Add route point** icon to enter the first route point.

The **DESTINATION** screen opens.

3. Indicate the destination as described in "Indicating a destination".

4. Tap **Add to route**.

The **ROUTE PLANNING** screen opens. The destination is added as route point 1.

5. Repeat steps 2-4 for every route point you want to add to the itinerary.

5.5.2 Editing, saving and managing itineraries

Survey

You may plan as many itineraries as you want, e.g. for holidays. You may save them and use them later for navigation purposes.

At any moment, you may add route points, modify the order of the route points, or display the itinerary on the map.

The following commands are available on the **ROUTE PLANNING** screen:

Selection

These icons are deactivated when the list does not contain any route point.

Up

Tap this icon to move the selection one route point up.

Tap this icon several times to move the selection several route points up.

Down

Tap this icon to move the selection one route point down.

Tap this icon several times to move the selection several route points down.

Changing the order

Route point up

Tap this icon to navigate to the respective route point earlier (example: route point 3 becomes route point 2).

Route point down

Tap this icon to navigate to the respective route point later (example: route point 2 becomes route point 3).

Deleting and adding route points

Delete route point

Tap this icon to delete the selected route point from the list.

This icon is deactivated when no route point is selected.

Add route point

Tap this icon to add a route point. The new route point will be added before the route point which currently has the focus. You may shift it using the **Route point up** and **Route point down** icons.

Managing itineraries

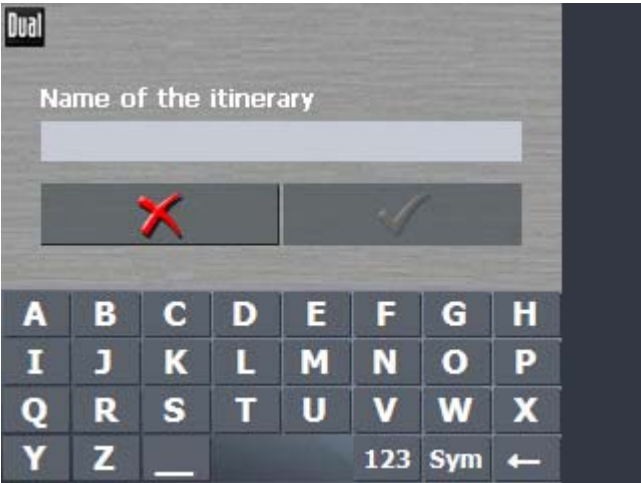

Save itinerary

Only itineraries that contain at least one route point may be saved. Otherwise this icon is deactivated.

- 1. Tap this icon to save the itinerary you have planned.

The **NAME OF THE ITINERARY** screen opens.

- 2. Enter a name for the itinerary.

For information on the use of the keyboard, please refer to "Software keyboard".

- 3. Tap **OK**.

Note: Only the route points will be saved. If you load an itinerary, you will have to recalculate it.

Load itinerary

This icon is deactivated if there is no saved itinerary available.

- 1. Tap this icon to load a saved itinerary, e.g. to modify it.

The **SELECT ITINERARY** screen opens:

- 2. Select the itinerary you want to load.

For information on working with lists refer to "Lists".

Rename itinerary

3. Tap .

1. Tap the **Load itinerary** icon. (This icon is deactivated if there is no saved itinerary available)

The **SELECT ITINERARY** screen opens:

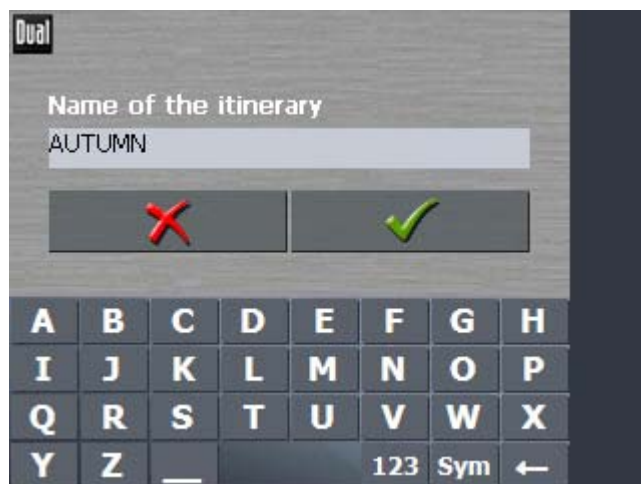

2. Select the itinerary you want to rename.

For information on working with lists, please refer to "Lists".

3. Tap the **Edit** icon.

The **NAME OF THE ITINERARY** screen opens:

4. Enter the new name of the itinerary.

For information on the use of the keyboard, please refer to "Software keyboard".

5. Tap  **OK**.

The **SELECT ITINERARY** screen reopens. The itinerary has been renamed.

6. Tap **OK** to load the renamed itinerary.
- OR -
Tap the **Back** icon to open the **ROUTE PLANNING** screen without loading an itinerary.

Delete itinerary

1. Tap the **Load itinerary** icon. (This icon is deactivated if there is no saved itinerary available)

The **SELECT ITINERARY** screen opens:

For information on working with lists, please refer to "Lists".

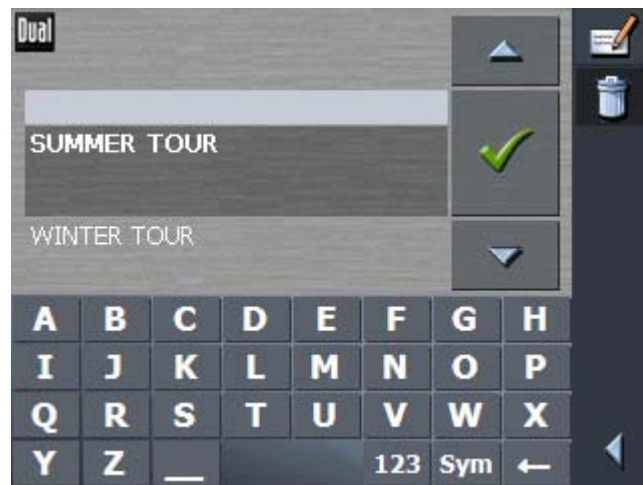

2. Tap the **Delete** icon to delete the selected itinerary.
The **CONFIRM** screen appears.

3. Tap

The **SELECT ITINERARY** screen reopens. The deleted route is no more listed.

5.5.3 Calculating the route

An itinerary may be calculated even without GPS reception in order to get an impression on the route.

The system assumes then the first route point to be the start point of the route.

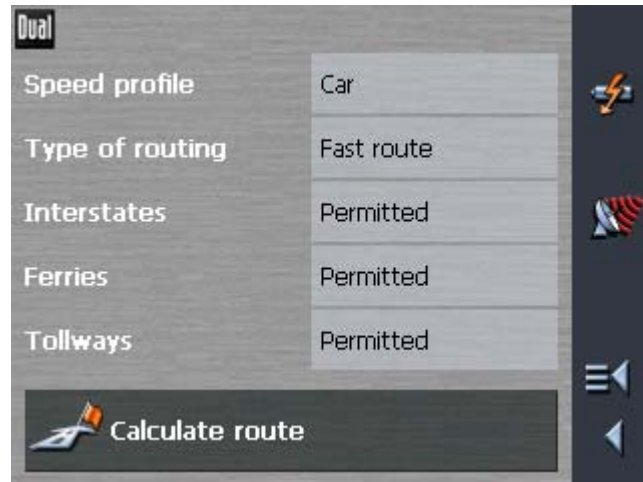

Note: When you start navigation, the system identifies your current position and makes it the start point. The first indicated route point is then the first stopover.

1. Tap this icon to calculate the distance and the estimated duration of the entire route.

The **ROUTE OPTIONS** screen opens:

2. Determine the route options.

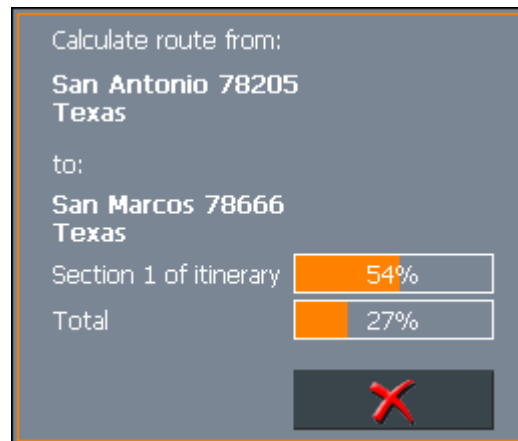

For detailed information on setting the route options, please refer to "Routing options".

Note: The standard settings for the route options may be changed on the **ROUTE OPTIONS** screen. For detailed information on changing the standard settings refer also to "Configuring XNAV3550".

3. Tap the **Calculate route** icon.

The route is being calculated. A message window informs you on the progress of calculation.

When the route is calculated, the total distance and the estimated duration from the first to the last route point are displayed below the route points list of the **ROUTE PLANNING** screen.

Total trip: 83mi Time 01 h 38 min

Furthermore, the distance and the estimated duration of each stage will be indicated with the selected route point entry.

5.5.4 Displaying the route on the map

Show route

Tap the **Show on map** button to display the entire route on the map.

The map screen opens.

The route is highlighted in orange.

The route points are marked by flags.

For information on working with maps, please refer to "Working with the map".

5.5.5 Simulating the route

Simulation

You may execute a simulated navigation along the itinerary when the route has been calculated.

Note: The reception of GPS signals is not necessary for the simulation.

Simulation is restricted to routes of 60 miles max.

1. Tap the **Show on map** button.

The route is displayed on the map.

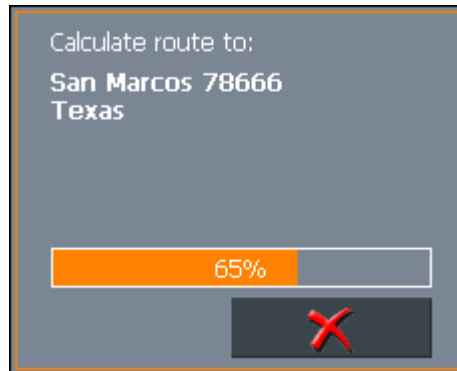

2. Tap this icon.

The **ADDITIONAL FUNCTIONS** screen opens.

3. Tap **Simulation**.

The route will be recalculated for simulation purposes.

Simulation starts when calculation has finished.

Stopping the simulation

You may quit a simulation at any moment.

1. Tap 

The **ADDITIONAL FUNCTIONS** screen opens.

2. Tap **Quit navigation**.

5.6 Starting navigation

Precondition

You have entered a destination as described in "Indicating a destination",

- OR -

You have selected a destination from the **FAVORITES** as described in "Favorites",

- OR -

You have selected one of your **RECENT DESTINATIONS** as described in "Recent destinations",

- OR -

You have planned or loaded an itinerary as described in "Route planning (Itineraries with stopovers)".

Extended mode

1. Tap **Start navigation**.

The **ROUTE OPTIONS** screen opens:

2. Determine the route options.

For detailed information on setting the route options, please refer to "Routing options".

Note: The standard settings for the route options may be changed in **SETTINGS – ROUTING OPTIONS**. For detailed information on changing the standard settings refer to "Settings".

The system calculates the route.

The map screen opens. Your current position is indicated by a green arrow. The route is highlighted in orange.

Note: When you start navigation after having planned or loaded an itinerary, then your current position is the start point of the route. The first indicated route point is then the first stopover of your route.

No GPS reception?

When the received GPS signal is not sufficient, the following message appears:

You have two possibilities:

- ⇔ Wait until navigation starts. This will happen as soon as the GPS reception is sufficient.
- ⇔ Tap  **Cancel** and restart navigation as soon as the reception of GPS signals is convenient. You may notice that by watching the GPS symbol on the screen: it becomes **GPS ready** when the reception is good.

6 Working with the map

Topics covered in this chapter:

6.1	Selecting a map	page 60
6.2	Operating the map	page 61
6.3	Representation of the map in navigation mode	page 66
6.4	Displaying additional information on the map	page 68

6.1 Selecting a map

Provided maps

There are additional maps included in the delivery on DVD. In case you want to use one of those maps, copy it via a card reader to a storage card.

Proceed as follows:

1. Connect your PC and your device via **ActiveSync**.
2. Insert the **XNAV3550** DVD 1 into your DVD drive.
The **Installer-Tool** starts automatically.
3. Click "Transmit map".
4. Follow the instructions on the screen.

Follow then the instructions given below in "Selecting a map".

Note: In case the **Installer-Tool** does not start automatically, start the Windows-Explorer. Select the directory of your DVD drive and double-click the "setup.exe" file.

Selecting a map

To load another map which is available on the currently inserted storage card, proceed as follows:

1. If the desired map is on another storage card than the currently inserted one, open the **MAIN SCREEN** and tap the **Quit** button.
 - 1a Remove the storage card, which is currently inserted.
 - 1b Insert the storage card, which contains the map you want to work with.
 - 1c Start **XNAV3550** over.

Note: You need not execute steps 1 to 1c unless there is more than one map stored on the inserted storage card.

2. On the **MAIN SCREEN**, tap the **Map** button.

The **AVAILABLE MAPS** screen opens:

3. Tap the entry of the map you want to work with.

4. Tap .

The selected map is now loaded. The **MAIN SCREEN** opens.

6.2 Operating the map

Survey

There are various pieces of information available on the **MAP** screen. Learn in this chapter about the possibilities for working with the map, which depend on whether you are in navigation mode or not.

Displaying the map

You may display the map

- ⇔ while planning a route,
- ⇔ in order to show destinations on the map, or
- ⇔ in order to select destinations on the map.

Extended mode

In "extended mode", you may display the map

- ⇔ Via the **Show map** button on the **MAIN SCREEN**
- ⇔ Via the **Select on map** button on the **DESTINATION** screen
- ⇔ Via the **Show on map** button on the **ADDRESS** screen after having entered an address.

Standard mode

In "standard mode", you may display the map

- ⇔ Via the **Show on map** button on the **ADDRESS** screen after having entered an address.

The **MAP** screen opens.

The map is being displayed automatically when you start navigating.

Tapping the map

Tapping short any place on the map makes the **ADDITIONAL FUNCTIONS** screen appear. Depending on whether you are in navigation mode or not this screen offers different functions.

Tapping long a certain place on the map (tap and hold) makes information on that place appear. You may then, e.g., take over the data for navigation purposes.

For details, please refer to "Indicating destinations on the map".

Icons

Survey

The Map screen disposes several icons which allow altering the representation of the map.

(When without GPS reception)

Hide/show icons

This icon allows you to hide all other icons in order to see more of the map.

Tap this icon again to show the other icons.

(When with GPS reception)

Automode

Tap this icon to display the standard representation of the map after you have modified the view.

The settings of north orientation and auto zoom mode will be applied. Your current position will be centered. The icons will not be displayed.

For details, refer to "Automode".

Freeze

This icon is activated in navigation mode only.

Tap the **Freeze** icon

to toggle between "Frozen map" and "Frozen position".

Frozen position (default)

This mode (button down) makes the map scroll continually. Your current position (green arrow) is always centered in the bottom third of the map.

Frozen map

This mode (button up) freezes the map. Your current position (green arrow) moves over the map and may even leave it.

This mode applies automatically when you scroll the map in navigation mode. Otherwise the system would always try to keep your current position in the bottom third of the map.

Select this mode when you want to select a destination from the map while navigation is in progress.

Zoom / Scroll

Tap the **Zoom/Scroll** icon

to toggle between Zoom and Scroll mode.

Zoom

In Zoom mode (Button up) you may scale the map up or down. Zoom in by drawing a rectangle on the map, beginning with the upper left corner. Zoom out by beginning with the lower right corner.

Scroll

In Scroll mode (button down) you may scroll the map. Tap on the screen and drag to the desired direction.

Entire route

Tap the **Itinerary** icon to display the whole itinerary.

Map in driving direction/north oriented

Tap the **In driving direction/North oriented** icon

to switch between the two available modes of map orientation. (North orientation / orientation in driving direction).

North orientation

Tap this icon (button down) to orientate the map north up.

Tap this icon (button up) to orientate the map in driving direction.

3D view

Tap this icon to display the map in 3D mode (bee flight view).

2D view

Tap this icon to return to the 2D mode (standard).

Zoom in

Tap **Zoom in** to scale the map down.

Zoom bar

Tap one of the zoom bar sections to modify the scale of the map.

Zoom out

Tap **Zoom out** to scale the map up.

Additional functions

Tapping this icon or tapping short any place on the map makes the **ADDITIONAL FUNCTIONS** screen appear. Depending on whether you are in navigation mode or not this screen offers different functions.

The range of offered functionality depends also on whether you are working in standard or in extended mode.

For information on how to change the user mode, please refer to "Changing the user mode".

The **ADDITIONAL FUNCTIONS** screen opens:

Tap this icon to toggle between "Day" and "Night" map view mode.

Settings

Tap **Settings** to display the **SETTINGS** screen. For details, please refer to "Settings".

Quit navigation

This function is only available in navigation mode. Tap **Quit navigation** to exit navigation mode.

Block road, Unblock

These functions are only available in navigation mode.

For details, please refer to "Blocking a route section".

Interim destination

This function is only available in navigation mode. Tap **Interim destination** to add a new route point to your itinerary. The route will be recalculated and the newly added route point will be the first destination to navigate to. Navigation to the other route points will be executed later.

For details, please refer to "Adding a route point during navigation".

Route options

This function is only available in navigation mode. Tap **Route options** to modify them.

For details, please refer to "Routing options".

Next destination

This function is only available when you are navigating a route with at least one stopover and when you are working in extended mode.

Use this function if you want to skip the next stopover.

Example: You have planned an itinerary from your office to "Company A" and then to "Company B" and you are already on your way. Before you arrive at "Company A", a mobile phone call informs you that you need not visit Company A.

Tap the **Next destination** button to navigate to the stopover after the next (here: "Company B").

The system recalculates the route. "Company B" will be your next destination.

Refer also to "Next destination".

6.3 Representation of the map in navigation mode

In navigation mode, there is some assistance for navigation, some information on the route and one more command button being displayed:

Assistance for navigation

The following assistance for navigation is being displayed at the left and at the bottom of the map:

Field	Information
①	If there are two maneuvers to be executed quickly one after the other, the small upper arrow field indicates the maneuver to be executed immediately after the next maneuver.
②	The green arrow indicates your current position on the map. Since the displayed sector of the map changes continually your current position is centered on the map whenever possible (Moving Map).
③	The bigger arrow field indicates the next maneuver to be executed.

Field	Information
④	<div>The distance field indicates the distance to the next maneuver. When you approach, the representations changes into a distance bar:  The more yellow bars are displayed the nearer you are to the place where the next maneuver must be executed.</div>
⑤	The upper street field indicates the name of the next street to turn on.
⑥	The lower street field indicates the name of the street you are currently on.

Information on the route

At the right of the map, the following information on the route is being displayed:

Field	Information
	This symbol means "stage". All information displayed below refers to the next route point.
9:44 pm	ETA (Estimated time of arrival).
01h 44m	Remaining time to arrival (estimated).
86 mi	Remaining distance to arrival (estimated).

Tap this icon to repeat the last spoken instruction. All available information will be displayed.

The displayed information will be hidden after a few seconds.

6.4 Displaying additional information on the map

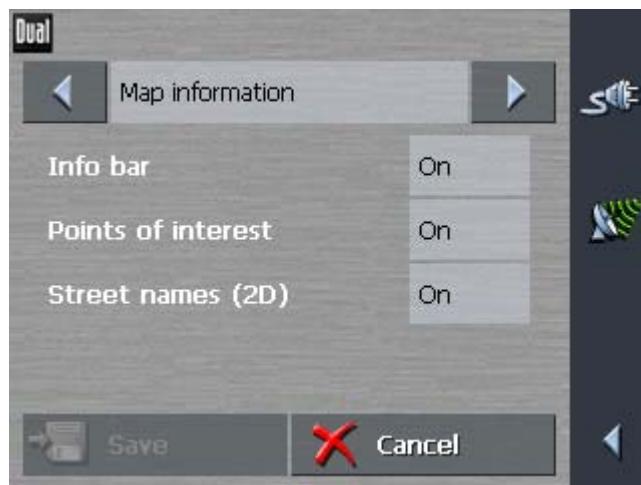

In **XNAV3550** you may determine which information is to be displayed on the map. Modifying any configuration begins on the **SETTINGS** screen.

Configuring the display of additional information...

1. Open the **SETTINGS** screen
 - ⇔ by tapping the **Settings** button on the **MAIN SCREEN**,
 - ⇔ or by tapping the **Additional Functions** button (or short into the map) and selecting **Settings**.

The **SETTINGS** screen opens.

2. Select **Map information** using the arrow buttons:

Info bar

The **Info bar** at the bottom of the map displays the scale of the map, the inclination, the compass, the altitude and the current speed. .

3. Tap the respective command button to display (On) or not (Off) the **Info bar**.

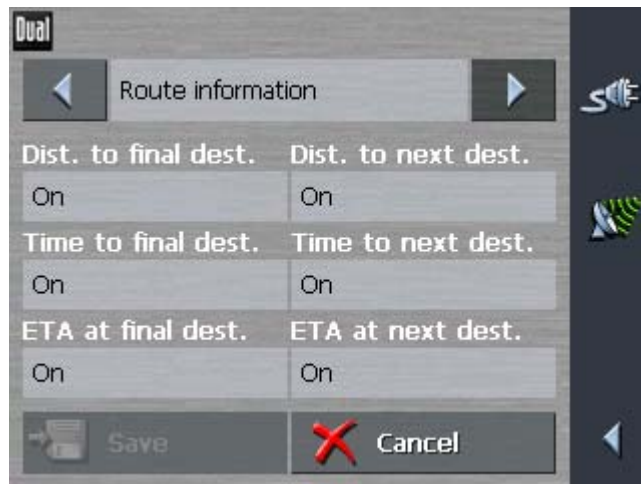

Points of Interest

4. Tap the respective command button to display (On) or not (Off) **Points of Interest** on the map.

Street names

5. Tap the respective command button to display (On) or not (Off) **Street names** on the map.

6. Via the arrow buttons select **Route information**:

7. Tap the command buttons to display (On) or not (Off) the respective information on the map.

The desired information on the entire route (upper section) and on the current stage (lower section) will be displayed at the right hand side of the map.

Section	Information
	This symbol means "route". All information displayed below refers to the final destination.
	This symbol means "stage". All information displayed below refers to the next route point. This section is only available if you have indicated more than one destination to navigate to.
Line 2	ETA (Estimated time of arrival).
Line 3	Remaining time to arrival (estimated).
Line 4	Remaining distance to arrival (estimated).

8. Tap **Save** to save the modifications.

The modifications will be taken over and displayed on the map.

7 Useful functions for navigation

Topics covered in this chapter:

7.1 Adding a route point during navigation	page 71
7.2 Next destination	page 72
7.3 Blocking a route section	page 72

Survey

In **XNAV3550** the following functions are available in navigation mode:

- ⇔ Adding a route point during navigation, see below
- ⇔ Skipping the next route point
- ⇔ Blocking a route section

7.1 Adding a route point during navigation

This function is only available in "Extended mode".

For information on how to change the user mode, please refer to "Changing the user mode".

Adding a route point during navigation...

At any moment during navigation you may add a new route point to your itinerary. The route will be recalculated in order to make the new route point the next destination to navigate to. The other remaining route points will be navigated to after the new one.

Adding a route point...

Precondition: The map is being displayed in navigation mode.

1. Tap short on any place on the map.
2. Tap **Interim destination**

The **DESTINATION** screen opens.

3. Indicate the new route point as described in "Indicating a destination".
4. Tap the **Set as route point** button.

The route will be recalculated in order to make the new route point the next destination to navigate to.

Note: Select the new route point directly on the map, just as described in "Indicating destinations on the map". Tap the respective place and hold. From the context menu, select **Add as route point**.

7.2 Next destination

This function is only available in "Extended mode".

For information on how to change the user mode, please refer to "Changing the user mode".

Next destination

Next destination

This function is only available when you are navigating a route with at least one stopover and when you are working in extended mode.

Use this function if you want to skip the next stopover.

Example: You have planned an itinerary from your office to "Company A" and then to "Company B" and you are already on your way. Before you arrive at "Company A", a mobile phone call informs you that you need not visit Company A.

Tap the **Next destination** button to navigate to the stopover after the next (here: "Company B").

The system recalculates the route. "Company B" will be your next destination.

7.3 Blocking a route section

Blocking a route section manually

You may block a route section manually in order to evade it. Manual blocking forces a recalculation of the route.

Presume that you are driving on a freeway and a radio message announces a traffic jam 4 miles ahead of your current position. With the "Block route sections" function you may instruct the navigation system to evade the announced traffic jam.

A manual blocking is only valid for the current navigation process. The respective route section will be unblocked for the next navigation or when you restart the software.

Blocking a route section...

Precondition: The navigation system is in navigation mode and the map is being displayed.

1. Tap this icon.
2. Tap **Block road**.

The **BLOCKING** screen opens.

3. Enter how many miles (from your current position on) you want to block.
4. Tap **OK**.

This forces a recalculation of the route. The indicated route section will be evaded. On the map, it will be highlighted in red.

Unblocking a route section

1. Tap short on any place on the map.
2. Tap **Unblock**.

The route section is now unblocked. The navigation system uses the route, which had been calculated originally.

8 Configuring XNAV3550

Topics covered in this chapter:

8.1	Settings	page 75
	User mode	
	Map information	
	Route information	
	Representation	
	Automode	
	Routing options	
	Itinerary	
	Time zone	
	Format	
	Home address	
	Product information	

8.1 Settings

Configuration

In **XNAV3550**, you may modify the following settings:

- ⇔ User mode
- ⇔ Map information
- ⇔ Route information
- ⇔ Representation
- ⇔ Automode
- ⇔ Routing options
- ⇔ Itinerary
- ⇔ Time zone
- ⇔ Format
- ⇔ Home address
- ⇔ Product information

On the **MAIN SCREEN**, tap the **Settings** button to configure **XNAV3550**.

On the **SETTINGS** screen, tap the arrow icons to select the configuration you want to modify.

Tap the **Save** button to apply your modifications if you have made some.

8.1.1 User mode

User mode

On the **USER MODE** screen, you may effect the following modifications:

Your current user mode is indicated on the **Current user mode** field.

Tap **Current user mode** to switch to the other user mode.

The name of the user mode you want to switch to becomes the caption of the entry field.

Tap **Save** to save the changes.

Note: When you switch to standard mode, a dialog window asks you whether you want to keep the configuration changes you have made in extended mode. This dialog window appears even when you have not made any configuration changes. Tap **Yes**.

Restoring the factory settings...

1. If you want to restore the factory settings, tap the **Factory settings** command.
2. Confirm the restoration.

8.1.2 Map information

This function is only available in "Extended mode".

For information on how to change the user mode, please refer to "Changing the user mode".

Info on the map

On the **MAP INFORMATION** screen, you may effect the following modifications:

Element	Signification
Info bar	<p>The Info bar at the bottom of the map displays the scale of the map, the inclination, the compass, the altitude and the current speed.</p> <p>Tap the respective command button to display (On) or not (Off) the Info bar.</p> 
Points of Interest	<p>Tap the respective command button to display (On) or not (Off) Points of Interest on the map.</p>
Street names (2D)	<p>Tap the respective command button to display (On) or not (Off) Street names on the map in 2D mode.</p>

8.1.3 Route information

This function is only available in "Extended mode".

For information on how to change the user mode, please refer to "Changing the user mode".

Route info

On the **ROUTE INFORMATION** screen, you may effect the following modifications:

Element	Signification
ETA at final dest.	ETA (Estimated time of arrival) at the final destination.
Time to final dest.	Remaining time to the final destination (estimated).
Dist. to final dest.	Remaining distance to the final destination (estimated).
	Tap the respective command buttons to display (On) or not (Off) the respective information on the map. All information displayed below refers to the final destination. .
	
ETA at next dest.	ETA (Estimated time of arrival) at the next route point.
Time to next dest.	Remaining time to the next route point (estimated).
Dist. to next dest.	Remaining distance to the next route point (estimated).
	Tap the respective command buttons to display (On) or not (Off) the respective information on the map. All information displayed below refers to the next route point.
	
	This section is only available if you have indicated more than one destination to navigate to

8.1.4 Representation

This function is only available in "Extended mode".

For information on how to change the user mode, please refer to "Changing the user mode".

Representation

On the **REPRESENTATION** screen, you may effect the following modifications:

Setting	Signification
Skin	Skins are made to personalize the user interface of XNAV3550 . Tap the Skin field. Select one of the available skins and tap OK .
Brightness day	Tap this field and select the brightness (1-8) of the display in "Day" mode.
Brightness night	Tap this field and select the brightness (1-8) of the display in "Night" mode.

8.1.5 Automode

This function is only available in "Extended mode".

For information on how to change the user mode, please refer to "Changing the user mode".

Auto mode

On the **AUTO MODE** screen, you may effect the following modifications:

Setting	Signification
Begin with	Select the default map view: 2D or 3D .
3D Autozoom	<p>Select the default for navigation with 3D view:</p> <p>Autozoom or No Autozoom.</p> <p>With Autozoom, the system changes the scale of the map depending on your current speed: When you drive slowly, the scale becomes small. When you drive fast, the scale becomes high.</p>
2D Autozoom	<p>Select the default for navigation with 2D view: Low Autozoom, Standard Autozoom, High Autozoom, or No Autozoom.</p> <p>With Autozoom, the system changes the scale of the map depending on your current speed: When you drive slowly, the scale becomes small. When you drive fast, the scale becomes high.</p> <p>The lower the Autozoom, the lower the scale.</p>
2D View	Select the default for navigation with 2D view: North oriented or In driving direction .

8.1.6 Routing options

Routing options

On the **ROUTING OPTIONS** screen, indicate your speed profile. This entry will have an effect on the calculation of the remaining time and of the **estimated time of arrival (ETA)**.

1. Tap the **Speed profile** button. Select one of the available profiles and tap **OK**.
2. Tap the **Type of routing** field and select one of the following options:

Option	Signification
Fast route	The quickest route will be calculated.
Short route	The shortest route will be calculated.

3. Tap the **Interstates**, **Ferries**, and **Tollways** fields successively and select one of the following options:

Option	Signification
Permitted	The respective kind of street will be regarded for route calculation.
Avoid	The respective kind of street will be avoided if reasonable.
Forbidden	The respective kind of street will be disregarded for route calculation.

8.1.7 Itinerary

This function is only available in "Extended mode".

For information on how to change the user mode, please refer to "Changing the user mode".

Proceeding automatically to the next route point...

On the **ITINERARY** screen, determine whether you want to navigate automatically to the next route point after having reached a stopover (Yes) or not (No).

Tap the **Proceed automatically to next destination** button to toggle between Yes and No.

If you do not proceed automatically, you may proceed as follows:

1. In navigation mode, tap short on any place on the map.
2. Select **Next destination**.

8.1.8 Time zone

Calculation of arrival times

On the **TIME ZONE** screen, select the time zone of the region you are currently staying in. This is necessary for the system to indicate correct times of arrival in navigation mode.

Element	Signification
Time zone	Tap this entry field to select the time zone of the region you are currently staying in.
Daylight saving time	Tap this entry field to switch between daylight saving time (yes) and standard time (no).

Note: If there is a clock change or if you are travelling into another time zone, you will have to adjust the respective setting.

8.1.9 Format

Units

On the **FORMAT** screen, determine which units are to be used for time and distance indications.

Setting	Signification
Time	Tap the Time field to toggle between 12 hours (AM/PM) and 24 hours time format.
Distance	Tap the Distance field to toggle between kilometers or miles distance units.

8.1.10 Home address

Home address

On the **HOME ADDRESS** screen, you may save your home address to quickly start navigation homewards from anywhere.

1. Tap **Enter your home address**.

The **DESTINATION** screen opens.

2. Tap the **Address** button and enter your home address as described in "Entering an address".

3. Tap the **Set as home address** button.

The address is indicated on the **HOME ADDRESS** screen.

8.1.11 Product information

Product information

On the **PRODUCT INFORMATION** screen, the name and the version of the software are displayed.

Tap **Show intro** to make the system explain its most important functions.

9 Glossary

<i>GMT</i>	<p>GMT (Greenwich Mean Time) is the mean solar time at the Royal Greenwich Observatory in Greenwich near London, England, which by convention is at 0 degrees geographic longitude. Theoretically, noon Greenwich Mean Time is the moment when the Sun crosses the Greenwich meridian (and reaches its highest point in the sky in Greenwich). Up to 1972, GMT was the global time standard. Because of the Earth's uneven speed in its elliptic orbit, GMT has been replaced by UTC (Universal Time Coordinated) which is an ultra stable time standard based on atomic clocks.</p>
<i>GPS</i>	<p>The GPS (Global Positioning System) is based on 24 satellites which are in orbit round the earth. They are permanently emitting the time and their current position. The GPS receiver receives this information and calculates the longitude and the latitude of its own current position.</p> <p>The signals of at least three satellites are needed to determine the longitude and the latitude. With the signals of at least four satellites the elevation may be calculated, too. The determination has an accuracy of about 3 yards.</p>
<i>HDOP</i>	<p>The Horizontal Dilution of Precision (HDOP) indicates the quality of position determination. Theoretically any value from 0 to 50 is possible. The smaller the value is, the more accurate is the position determination (value 0 = no deviation from the actual position). Values up to 8 are convenient for street navigation.</p>
<i>POI</i>	<p>Point of Interest (POI). See ➔Special destination.</p>
<i>Special destination</i>	<p>Special destinations, also called POI (Points of Interest), are covered by the map and may be displayed on it. Harbors, airports, restaurants, hotels, gas stations, public buildings, and others belong to the special destinations. You may determine special destinations as route points for navigation purposes.</p>
